

POWDER COATED ALUMINUM outdoor furniture is both durable and lightweight, making it a great fit for high-traffic environments. Rust proof and weather resistant, this commercial-grade powder coated aluminum outdoor furniture will remain beautiful over its lifetime.

RESIN WICKER is made of a synthetic polyethylene material. Durable and elastic, resin wicker offers comfort and style that will resist weathering and last. Suitable for high-traffic environments, resin wicker is an excellent choice for those looking for low maintenance outdoor furniture. Powder coated aluminum serves as a durable and strong frame on which the resin wicker is wrapped.

TEKWOOD is a wood-alternative poly material, that is proven in a variety of climate and high-traffic conditions. This commercial-grade material is durable, strong and made to last. It is available in natural and vintage gray, providing the look of teak with minimal weathering and maintenance. Tekwood is one of the authentic looking poly products on the market.

SLING is a composite mesh fabric woven using PVC coated polyester and is a material ideally suited to the outdoor environment. Durable, easy to maintain and comfortable, Oxford Garden's composite sling provides commercial-grade quality outdoor seating. Available in many colors, the sling options allow for personalized style in any environment.

FABRIC cushions all feature quick-dry construction with a waterproof bag encasing the foam core and a vented bottom to allow for drainage. Premium Sunbrella® solution-dyed acrylic fabrics provide superior durability, and solution-dyed polyester is available as an economical fabric option.

MATERIALS & CARE

Thoughtful Design **MADE RIGHT**

POWDER COATED ALUMINUM, RESIN WICKER and SLING require little maintenance, however regular cleaning is recommended to keep furniture looking new. Wash gently with a mild non-abrasive cleanser, rinse well and let dry.

TEKWOOD products should be cleansed using a mild, non-abrasive cleanser and rinsed well. Over time, Tekwood's color may darken slightly if exposed to sun and other natural elements. This process cannot be reversed, but does not affect the structural integrity or aesthetic of the product. To prolong this process, Oxford Garden recommends bringing furniture indoors or covering when not in use or during non-seasonal months. Tekwood has the potential to stain. To help prevent staining, use a furniture polish or protectant that is labeled safe for plastic materials prior to use.

Magnified sunlight will burn Tekwood material leaving a burn mark. Some glassware and stemware are capable of creating a magnifying effect when in direct sunlight. To avoid this potential damage, select glassware and stemware that does not magnify sunlight. Cigarettes and open flames will also emit enough heat to create a burn mark on Tekwood material. To prevent this damage, do not subject Tekwood to cigarettes or open flame.

Brush dirt off **FABRIC** before it becomes embedded in the fabrics, and clean spills soon after a stain occurs. Blot (don't rub) liquid spills with a clean, dry cloth. For oil-based spills, apply an absorbent such as corn starch, then remove with a straight edge. Spray on a mild cleaning solution of soap (such as Dawn® or Wollite®) and water. Rinse the fabric thoroughly to remove all soap residue and air dry.

CARE

WARRANTY

Oxford Garden warrants all outdoor furniture and accessories to be free from manufacturing defects in material and workmanship. Provided the furniture is assembled correctly and is subjected to normal use, Oxford Garden will cover your outdoor furniture under five, three and one year warranties, varying by material. For more details regarding the Oxford Garden warranty, visit oxfordgarden.com/warranty.
